Introduction

This School Food and Beverage Policy Quick Reference Guide is intended to be used as a portable resource for purchasing food and beverages to offer for sale in your school.

When purchasing food or beverages to offer for sale in your school:

- All of the products, in all venues, through all programs, and at all events, must meet the 80/20 rule.
- Food and beverages are assessed separately.
- If there are fewer than 5 choices, all products must meet the Sell Most criteria.
- For Mixed Dishes Without a Nutrition Facts Table, assess each major and minor ingredient using the nutrition standards.

Remember:

- Strategies developed to reduce the risk of exposure to anaphylactic causative agents.
- The accommodation of student and staff religious and/or cultural needs.
- Practices related to safe food preparation, handling and storage.

Introduction

All food and beverages fit into one of three categories: *Sell Most, Sell Less* or *Not Permitted for Sale*.

Sell Most (≥ 80%)	Sell Less (≤ 20%)	Not Permitted for Sale
Products in this category are the healthiest options and amounts generally have higher and/or sodium of essential numbeverages in lower amounts of category. and/or sodium.	trients and than food and	Products in this category generally contain few or no essential nutrients and/or contain high amounts of fat, sugar, and/or sodium (e.g., deep-fried and other fried
Products in this category must make up at least 80 per than cent of all food choices ar all beverage choices that are offered for sale in all venues, through all programs, and at all all events.	Products in this category must make up no more and 20 per cent of all food choices and all beverage choices that are offered for sale in all venues, through programs, and at all events.	foods, confectionery). Products in this category must not be sold in schools.

Reading the Nutrition Facts Table

To apply the nutrition standards, you will have to read the food label. In Canada, the food label is mandatory on pre-packaged food and beverages, with some exceptions (e.g., in-store bakery items).

A food label includes two mandatory components:

- the Nutrition Facts table
- the ingredient list

Source: Interactive Nutrition Label – Get the Facts, http://www.hc-sc.gc.ca/fn-an/label-etiquet/nutrition/cons/inl-flash-eng.php 2005. Reproduced with the permission of the Minister of Public Works and Government Services Canada, 2010.

Reading the Nutrition Facts Table

Serving Size

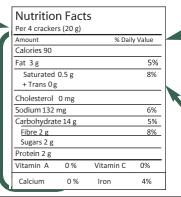

Apply the Nutrition Standards to the serving size listed on the Nutrition Facts table.

Core Nutrients

The 13 core nutrients are mandatory in the Nutrition Facts table and are always listed in the same order.

Ingredient List The first ingredient on the ingredient list is sometimes used to determine how a product fits into the nutrition standards.

Nutrition Facts Table for Crackers

Ingredients: whole grain wheat including the germ, vegetable oil, salt

% Daily Value

Use the % Daily Value (DV) to determine if a product has a little or a lot of a nutrient. The % DV is also helpful in making comparisons between products.

Trans Fat

The formula to determine if a food or beverage product meets the trans fat requirement is:

(g) = % of fat from transfat

Steps to Classify Food and Beverages

To determine which category a specific food or beverage fits into, follow these three steps:

STEP1- Compare the total fat and trans fat amounts (in grams) on your product's Nutrition Facts table with the Trans Fat Standards. If your product does not meet the Trans Fat Standards, it is Not Permitted for Sale (do not proceed to Step 2).

STEP 2—Identifythegroup and sub-group in the nutrition standards that your product fits into. (see the A-Z Food and Beverage List).

STEP3 – Compare the relevant information on your product's food label (i.e., the Nutrition Facts table and ingredient list) with the nutrition criteria in the nutrition standards. Your product will fit into one of the following categories: *Sell Most, Sell Less,* or *Not Permitted for Sale.*

The information on a Nutrition Facts table is based on a serving size. If the package size is different than the serving size, the nutrition criteria must be calculated in proportion to the package size to determine whether the package fits into the *Sell Most, Sell Less* or *Not Permitted for Sale* category (e.g., if the serving size on the Nutrition Facts table is 250 ml, but the package size is 500 ml, you would have to multiply the nutrition criteria by 2 to determine which category the 500 ml package size fits into).

TRANS FAT STANDARDS

Trans Fat Standards

The Trans Fat Standards (O.Reg.200/08) requires that any food, beverage, or ingredient offered for sale in a school, or used as an ingredient in the preparation, in a school, of a food or beverage offered for sale in a school, must meet the following prescribed amounts of trans fat:

- The trans fat content does not exceed 2% of the total fat content for vegetable oil or soft, spreadable margarine.
- The trans fat content does not exceed 5% of the total fat content for any food, beverage or ingredient, other than vegetable oil or soft, spreadable margarine.

Calculating Trans Fat

- Identify the amount, in grams (g), of Fat and Trans Fat on your product's Nutrition Facts table.
- Enter these two numbers into the following formula:

Formula:
$$\frac{\text{Trans (g)}}{\text{Fat (g)}} \times 100 = \% \text{ of total fat from trans fat}$$

Vegetables and Fruit

	Sell Most (≥ 80%)	Sell Less (≤ 20%)	Not Permitted for Sale
