The membership of the committee does not have the expertise required to fulfill the mandate by themselves. Also there are too many people on the committee now for there to be good discussion. We have so many programs and school services across our vast board and I always think it's important to keep on top of them. In particular, it would be valuable to have reports from admin on how programs are evaluated/assessed to meet their goals. This will be increasingly important as we have to make hard decisions about cuts to programs to balance our budget. We're going to want to know which of our programs are absolutely essential, meeting their goals/objectives, and which, unfortunately, may not be meeting their goals and are also less vital for the success and well-being of our students.
